June One

My, what AN ugly spaceship!

WELCOME TO VENUS

You'd think they'd make them more phallic, wouldn't you?

I think it's kinda cute.

Monday
June Two

Why doesn't that sign have a pole?

Well, first of all, it's made of Venusian lighter-than-air wood, so it doesn't need one...

And second, due to a glitch in our ecology, there are NO poles on Venus.

I think I'm going to like it here!

FOR IT IS WRITTEN: In the Kingdom of the blind, the one-eyed snake is KING

If all started when I got this ad in the mail...

VISIT VENUS THE PLANET OF BEAUTIFUL WOMEN AND NO MEN SPECIAL \$49.95

Too good to be true, I thought, and besides, Earth women are nice, too. But I just happened to have fifty bucks.

And I found the difference is not the beauty, but that the Venus girls like to SHAVE

My, how it flies!

When you're having fun!

Earth scientists believe that Venus is too hot for life. That is partially true. However, we developed the air conditioner before we invented the wheel.

June Four

60627

Next we started on developing space travel so we could bring new from Earth

yeah, first things first. Eventually you'll get around to the wheel.
