

This is an interesting configuration on which we are depicted.

What is really fascinating is that we are able to perceive that we occupy one or six dimensions, as if we were inside and outside our own universe at once.

Ha! None of them are aware that there is a higher reality outside their six dimensions

Do you believe in cartoonists?

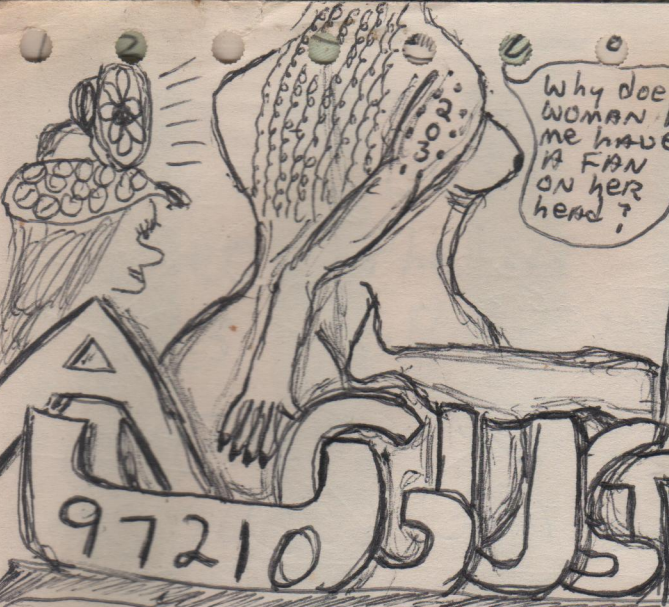

I wonder if they're aware of the existence of my dimension, I can't read their speech balloon from here.

THURS. AUG. 2

Why does that woman behind me have a fan on her head?

She's a real Airhead.

But seriously, that's the captain's latest invention for non-smokers. It blows the smoke away from them.

It's called a blower-top.
