

THE NORTH AMERICAN UNION

Whatever happened to the North American Union? We were hearing about the idea back during the Bush II era, mostly from paranoid right-wingers who hated it and imagined there was a conspiracy to bring it about right under their noses.

Perhaps someone, seeing the benefits of the European Union, proposed that we North Americans should adapt the concept for our own continent. At the time, it was something to think about, but no concrete plans to bring it about were likely. Most of the “details” were actually invented by the opposition as a focus for their conspiracy theories.

As long as Canada, the US, and Mexico maintained friendly relations with one another and trade thrived, there was little incentive to bring them even closer. Presidents of both parties understood the need to settle any differences with quiet diplomacy, and to avoid making immigration between neighbor nations a major issue.

That was before the election of an intellectually challenged con-man who used xenophobia and religious bigotry as his main attraction, with a thinly disguised promise to ‘Make America White Again’. In doing so, he has incited all the anti-immigrant fervor he could, making the natural flow of human beings a hugely divisive issue. Perhaps it’s time to redefine migration, borders, and cooperation between neighbors. It may be time to seriously pursue the NAU. Here’s a video describing the basics:

We know the shortcomings of the past and the present. We should be thinking of what we need to change, considering big ideas as well as small corrections.
